PROFESSIONAL SUMMARY

Hands-on, systems-focused IT professional with 14+ years of experience across **systems administration, network infrastructure, virtualization, and enterprise IT operations**. Proven experience deploying virtual machines via VMware ESXi, configuring Windows Servers, validating Cisco routing/switching and VLAN architectures, and administering hybrid Entra ID / Active Directory environments. Experienced in industrial OT/SCADA network coordination, iLO/MGMT/iSCSI storage configurations, and automated device management with Microsoft Intune.

TECHNICAL SKILLS

- **Server & Virtualization:** Windows Server (2008 R2, 2012, 2016, 2019, 2022), VMware vSphere / ESXi VM deployments, Linux fundamentals, iLO / Out-of-Band Remote Management.
- **Networking & Protocols:** TCP/IP, DNS, DHCP, VLAN Segmentation, Subnetting, Cisco Catalyst / Nexus concepts, SFP/Fiber Optics, VPNs (FortiClient, IPsec), NAT, Routing & Switching.
- **Storage & Infrastructure:** iSCSI SAN/NAS networks, VM/MGMT network segregation, server rack/PDU installation, hardware provisioning.
- **Identity & Cloud:** Entra ID (Azure AD), Active Directory Domain Services (AD DS), Group Policy (GPO), MFA, RBAC, Single Sign-On (SSO), Microsoft 365 Tenant Administration.
- **Automation & Scripting:** PowerShell, Windows Batch (BAT), automated configuration scripts, Intune zero-touch Autopilot deployments.
- **Security & Monitoring:** SentinelOne EDR, BeyondTrust / PRA, Fortinet, Wireshark, OT/SCADA network scan coordination, asset walkdowns, change control procedures.
- **Physical & Site Systems:** Genetec CCTV, IP-based Access Control & Keypads, intercom systems, industrial SCADA/Ignition network readiness.

PROFESSIONAL EXPERIENCE

NPK International / Newpark Resources Inc. | Carencro, LA

Service Desk II & Infrastructure Support | *September 2024 – October 2026*

- Spearheaded on-premise OT and IT server/storage infrastructure readiness: validated physical connectivity, SFP/switch port mapping, VLAN documentation, and iLO/MGMT/VM/iSCSI cabling.
- Partnered with Network Engineering and Cybersecurity teams to coordinate OT network scans, change requests, firewall port requirements, and vulnerability remediation across unmanaged switch segments.
- Managed enterprise cloud identity and endpoint systems: automated user and device configurations across Entra ID, Microsoft Intune, and Autopilot.
- Led multi-site infrastructure assessments (e.g., Schriever site audit), evaluating switch/router health, wireless AP coverage, CMDB data integrity, and hardware lifecycle standardization.
- Oversaw the migration and maintenance of physical security and IP devices: coordinated vendors (Techneaux/NextGen) on Genetec CCTV camera overhauls, IP gate keypads, and intercom routing.
- Authored technical SOPs and Knowledge Base articles in FreshService for identity lifecycle, server procedures, and system offboarding protocols.

Expro Americas | Broussard, LA

IT Operations Analyst | *September 2013 – September 2024*

- Collaborated with Senior Systems Administrators to deploy, configure, and maintain production Windows Servers (2008/2012/2016) and virtualized environments in VMware ESXi.
- Assisted with physical rack installation, cabling, and basic port/VLAN configuration for Cisco enterprise routers and switches.
- Managed Active Directory (AD DS) user objects, security groups, organizational units (OUs), and Group Policy Objects (GPOs).
- Built automated Windows Batch (BAT) scripts to perform scheduled maintenance, drive mappings, log gathering, and system rollouts.
- Supervised hardware refreshes and server room maintenance, ensuring power redundancy (UPS), proper cooling, and cable management.
- Coordinated with international IT infrastructure teams during corporate divestitures to migrate systems, verify data backups, and execute equipment re-provisioning.

Xtreme PC Service | Lafayette, LA

Owner & Systems/Network Technician | *June 2009 – September 2013*

- Designed, installed, and supported local area networks (LANs), Wi-Fi access points, routers, and switches for regional small businesses.
- Deployed and configured small business servers, network-attached storage (NAS) backup devices, and point-of-sale (POS) systems.
- Performed deep hardware troubleshooting, component-level motherboard/power supply diagnostics, and OS disaster recovery.
- Provided contract IT support and emergency on-site troubleshooting for commercial clients.

EDUCATION

Associate of Science (AS) in Industrial Technology

South Louisiana Community College | Lafayette, LA | *Cumulative GPA: 3.0*
